

Webinar series – Making the business case for green construction

#1 Which future for housebuilding?

23 November 2021 at 10:30 CET

PROGRAMME

The European Union is currently setting the foundations for reaching its objective of carbon neutrality in 2050.

Soon, key buildings legislation, such as the Energy Performance of Buildings Directive, is going to be introduced or revised and the construction industry has to undergo a deep transformation to adapt to these developments and to contribute to the overall ambition of carbon neutrality.

With this webinar we want to illustrate the business case for green housebuilding and send a strong signal to stakeholders in the construction industry about why and how to embrace the green transition.

Opening remarks

 **Domenico Campogrande**, DIRECTOR GENERAL OF FIEC

Moderation

 **Oliver Rapf**, EXECUTIVE DIRECTOR OF BUILDINGS PERFORMANCE INSTITUTE EUROPE

Where are we heading in terms of legislation?

 **Serena Pontoglio**, DG ENERGY, EUROPEAN COMMISSION,
TEAM LEADER “BUILDINGS POLICY AND RENOVATION WAVE IMPLEMENTATION”

What are our clients’ ambitions?

 **Emmanuelle Causse**, SECRETARY GENERAL OF INTERNATIONAL UNION OF PROPERTY OWNERS (UIPI)

What can construction companies do to become greener?

 **Joel Schons**, CEO OF STUGALUX CONSTRUCTION SA - FIEC VICE-PRESIDENT

 **Lorraine Fitzgerald**, HEAD OF SUSTAINABILITY OF GLENVEAGH PROPERTIES PLC
