FIEC Press Release

08-03-2018

More EU budget for transport – the best investment plan for Europe !

■ We are more than 40 transport organisations, authorities, cities, industries aiming to create a clean, safe and efficient transport system which is accessible for all. We are therefore advocating for more EU funds for transport in the next Multi-Annual Financial Framework.

« Together with a number of other organisations involved in transport matters, FIEC believes that investing in transport, and in particular in the Trans-European Transport Network (TEN-T), is crucial for Europe's growth and jobs, » stressed FIEC President Jean-Louis Marchand. « This is why we advocate for a stronger budget for the Connecting Europe Facility for after 2020, with grants remaining the major component, » added Marchand.

Indeed, FIEC considers that there are a number of transport infrastructure projects which are vital for EU's competitiveness but do not generate the necessary return on investment in order to attract private investors. They therefore require a strong commitment from the EU and national public authorities.
