The event succeeds the efficient first exhibition and conference Rebuild Ukraine, which took place this February and exceeded all expectations and inquiries of all stakeholders – international manufacturers, local communities and partners from the whole world. The organizer is the Ukrainian-British exhibition company Premier Expo.

[POST SHOW REPORT](#)

The main objectives of this event is to attract the fundraising from international institutions for recovery of Ukrainian communities, assisting Ukrainian energy companies in the restoration of the critical infrastructure facilities affected during war aggression, and to promote an investment appeal of the cities and regions of Ukraine. These areas support millions of temporary displaced families and have favourable investment possibilities.

ReBuild Ukraine second edition creates a platform to unite state authorities, international donor and financial organizations, territorial communities, representatives of charity funds, investment companies, development agencies, public and private energy generating, energy distribution, energy supply companies, construction, architectural and engineering companies. This Event continues to organize active participation of the business in rebuilding of Ukraine.

Visitors and guests of ReBuild Ukraine powered by Energy will get a touch to a unique exposition of construction technologies, equipment and materials, green technologies, global achievements of construction and energy industries introduced by the leading **557 manufacturers from 29 countries**.
