

Pact for Skills in Construction

WHAT IT IS

The Pact for Skills in Construction, launched in 2022 by FIEC, EFBWW, and EBC, is an initiative promoted by the European Commission within the framework of the 'EU Skills Agenda'. Link to the Pact: [here](#).

OUR AIM

The Pact aims to promote quality investment in vocational education and training, as well as in knowledge, skills, and competencies for the benefit of the European construction sector workforce. To achieve this, the Pact seeks to mobilize a concerted effort among private and public partners.

OUR TARGET

The ambition is to have 30% of workers in the construction industry participating in upskilling or reskilling actions annually by 2030.

WHY YOU SHOULD SIGN THE PACT

- Gain visibility and networking opportunities through a large network of stakeholders across Europe
- Access to EU funding opportunities
- Stay informed on skills trends and best practices
- Connect with policymakers and industry leaders in participating in dedicated EU events

FIVE KEY PRINCIPLES

Building strong partnerships, including with Vocational Education and Training institutions.

Monitoring occupational supply/demand and anticipating knowledge, skills and competences needs.

Working against discrimination.

Attracting more young people and women in the sector.

Promoting a culture of lifelong learning for all
